Amerika Plads  
Copenhagen, Denmark

The march of urban development along the Copenhagen waterfront is in full swing. Taken together with construction on Amerikakaj and alongside Dampfærgevej, the ambitious projects at Midtermolen, Indiakaj, Capellakaj, the inner part of Østmolen and Langelinie, it crystallises the dynamism, determination and entrepreneurial drive that distinguish this area. 'Dragonlights', designed by Arjan Groot of West 8, are a contemporary interpretation of the historical dragon-shaped street lamps.

project	Amerika Plads
client	Port of Copenhagen
landscape architect	west 8, Netherlands/Belgium
electrical installation	Leif Hansen Radgivende Ingeniører A/S
