

Download 

The march of urban development along the Copenhagen waterfront is in full swing. Taken together with construction on Amerikakaj and alongside Dampfærgevej, the ambitious projects at Midtermolen, Indiakaj, Capellakaj, the inner part of Østmolen und Langelinie, it crystallises the dynamism, determination and entrepreneurial drive that distinguish this area. 'Dragonlights', designed by Adrian Geuze of West 8, are modern version of the historical luminaire designed by Vilhelm Dahlerup in 1892.

project	Amerika Plads
client	Port of Copenhagen
landscape architect	west 8, Netherlands/Belgium
electrical installation	Leif Hansen Radgivende Ingeniører A/S
